

U16 Series

1/16 Brick 168W

Efficiency >93%	405W/in³	INPUT 2:1/4:1	Remote ON OFF	Full Metal Package
4.5Mhrs MTBF	Open Frame Package	OVP	OTP	OCP
				

The U16 series power module provides 150W maximum outputs with industry standard sixteenth brick pin assignment. The efficient SR stage is combined with patented “Buck-reset Forward” topology that would reduce power loss to achieve 405W/in³ power density. The multi-layer single side circuit board design plus the fully metal-enclosed package would enhance the thermal performance and improve its reliability. The module is designed for Telecom, Servers, Networking equipments and other industry applications that use a 24V or 48V input bus.

PART NUMBER SYSTEM (Total height = standoff height + module thickness) *Preliminary Data Sheet*

SPECIFICATIONS

Absolute Maximum Ratings

Temperature	Operation Storage	-40°C to +110°C -55°C to +125°C
Input Voltage Range	Operation: 18V/24V Models 36V/48V Models Transient (100mS): 18V/24V Models 36V/48V Models	-0.5V to +40Vdc -0.5V to +80Vdc 50V Maximum 100V Maximum
Isolation Voltage	Input to Output Input to Case Output to Case	2.0KV Minimum 1.0KV Minimum 1.0KV Minimum
Remote Control		-0.5V to +12Vdc

General Parameters

Conversion Efficiency	Typical	See table
Switching Frequency	Typical	400KHz
MTBF	Belcore TR-332 issue 6	4.50×10 ⁶ hrs @GB/25°C (U1648050abcd-25XXX)
OTP	T _{AVG} or T _C	110°C ±5°C for standard setting
Weight	Packaging related	11~28g

Control Functions

Remote Control	Logic High Logic Low	+3.0V to +6.5V 0V to +1.0V
Input Current of Remote Control Pin		-0.5mA ~ +1.5mA

Input

Operation Voltage Range	18V(24V) Models 36V(48V) Models	+9V(+18V) to +36Vdc +18V(+36V) to +75Vdc
Reflected Ripple Current	L _{EXT} = 10uH	20mA rms/60mA _{p-p}
Power ON Voltage Ranges	18V Models 24V/36V Models 48V Models	+8.5V to +9.0Vdc +17.0V to +18.0Vdc +34.0V to +36.0Vdc
Power OFF Voltage Ranges	18V Models 24V/36V Models 48V Models	+7.8V to 8.3Vdc +15.6V to +16.6Vdc +31.2V to +33.2Vdc
Off State Input Current	V _{NOM}	6mA Max
Latch-State Input Current	V _{NOM}	8mA Max
Input Capacitance	18V/24V Models 36V/48V Models	20.0uF Max 14.0uF Max

Output

Voltage Accuracy	Typical	±1.0%
Line Regulation	Full Input Range	±0.2%
Load Regulation	0%~100%	±0.2%
Temperature Drift	-40°C ~100°C	±0.03%/°C
Output Tolerance Band	All Conditions	±4%
Ripple & Noise (20MHz)	Peak-Peak (RMS)	3% (1%) V _O
Over Voltage Protection	V _{NOM} , 10% Load	115~130 %V _O
Output Current Limits	V _{NOM}	108%~125%
Voltage Trim	V _{NOM} , 10% Load	±10%
Input Ripple Rejection (<1KHz)	V _{NOM} , Full Load	-50dB
Step Load (2.5A/μS)	50%~75% Load	±6%Vo/500μS
Start-Up Delay Time	V _{NOM} , Full Load	20mS/250mS

TYPICAL WAVES AND CURVES

U16 Series

OPEN FRAME

Dimensions and Pin Connections

Designation	Function Description	Pin #
+IN	Positive input	1
PC	Remote control. To turn-on and turn-off output.	2
-IN	Negative input	3
-Vo	Negative output	4
-S	Negative remote sense	5
TRIM	Output voltage adjust	6
+S	Positive remote sense	7
+Vo	Positive output	8

Dimensions: inches (mm)

Tolerances: .xx±0.02 (.x±0.5)

.xxx±0.01 (.x±0.25)

Weight: 11g / Sixteenth Brick

Base-plate: None

Maximum torque: NA

Pin material: Copper alloy or Brass

Pin plating: Golden over Nickel

U16 Series

METAL ENCLOSED

Dimensions and Pin Connections

Designation	Function Description	Pin #
+IN	Positive input	1
PC	Remote control. To turn-on and turn-off output.	2
-IN	Negative input	3
-Vo	Negative output	4
-S	Negative remote sense	5

REFERENCED EMC CIRCUIT

Referenced Input Filter Circuit

The circuit shown in left-hand side can be used as a design reference for customer system. The EMC performance of customer's system depends on the whole system design. It should be noted that modifications on the circuit parameters and fine adjustment of the final layout affect the final EMC performance. Since no components are ideal for infinite frequency range. The bandwidth of EMC components should be taking into consideration when designing an EMC filter circuit.

EXTERNAL OUTPUT CAPACITANCE

For reducing the ripple/noise voltage on the load or the peak voltage deviation caused by a step load, additional capacitor is required for decoupling the unwanted voltage components from the load. Since the step load performance is mainly dominated by the feedback loop performance, which also affected by the additional output capacitance. To put some low-bandwidth high capacitance Electrolytic capacitors very close to the power module help nothing and even introduces unwanted effects on the feedback performance, sinking or sourcing surge current damaging the power module. Onetech suggest to put a low ESR capacitor with simply sufficient capacitance to handle the short duration high frequency component of ripple/noise or voltage peak deviation, and the capacitor needs to be as close as possible to the load. Do not add capacitor for no reason.

NOTE:

1. It is recommended that the input should be protected by fuses or other protection devices.
2. All specifications are typical at nominal input, full load and 25°C unless otherwise noted.
3. Specifications are subject to change without notice.
4. Printed or downloaded datasheets are not subject to Onetech document control.
5. Product labels shown, including safety agency certificates, may vary based on the date of manufacture.
6. Information provided in this documentation is for ordering purposes only.
7. This product is not designed for use in critical life support systems, equipment used in hazardous environments, nuclear control systems or other such applications, which necessitate specific safety and regulatory standards other than the ones listed in this datasheet.

IMPORTANT

※ General specifications and the performances are related to standard series only, no special customer specification display here except requested items.

※ In order to secure effective usage of converter and the validity of Onetech's service and warranty coverage, please refer to the application notes for general usage. For needs of usage beyond the application notes, please contact to Onetech headquarter or our regional sales representative office for help.
